I am currently working as a Senior Software Developer and Technical Lead with a background in B.Sc. IT from Dehradun. I am seeking an opportunity in an organization where I can contribute effectively, continue to learn, enhance my technical skills, and achieve both professional and monetary growth.

WORK EXPERIENCE

October 2024 - Present
Sr. Software Developer *Isynbus Technologies Pvt Ltd*
- Developed and implemented software solutions to meet client requirements, enhancing system functionality and user satisfaction.
- Developed custom APIs, enabling seamless integration with third-party services and enhancing system interoperability.
- Led the development and implementation of a new software architecture, significantly improving system efficiency and scalability.

September 2021 - September 2024
Sr. Software Developer and Technical Lead *Teq Mavens Pvt. Ltd.*
- Developed and implemented software solutions to meet client requirements, enhancing system functionality and user satisfaction.
- Mentored junior developers, providing guidance on best practices in coding and system design to foster team development.
- Wrote and developed new and well-tested code for different software projects.

November 2020 - September 2021
Sr. Software Engineer *Crochet Technologies Pvt. Ltd.*
- Spearhead design, coding, and modification of websites, ensuring alignment with client specifications from layout to functionality.
- Collaborated with cross-functional teams to identify system requirements, improving software functionality and user experience.

February 2019 - October 2020
Software Developer *Smartdata Enterprises India Ltd.*
- Worked closely with other team members to identify and remove software bugs.
- Developed and implemented software solutions to meet client requirements, enhancing system functionality and user satisfaction.
- Developed new, efficient and well-tested code for variety of different software projects.

March 2018 - February 2019
Software Engineer *Webguruz Technologies Pvt. Ltd.*
- Collaborated with cross-functional teams to identify system requirements, improving software functionality and user experience.
- Developed and implemented new software applications, enhancing company productivity and client satisfaction.

PROJECTS

Dynamic routing for data integrity and delay differentiated services in wireless sensor network, Applications running on the same Wireless Sensor Network (WSN) platform usually have different Quality of Service (QoS) requirements. Two basic requirements are low delay and high data integrity. An algorithm called integrity and delay differentiated routing algorithm is used to achieve both requirements using different routing paths.

PERSONAL INFORMATION

Total Experience: 8 Years 3 Month

SOCIAL NETWORKS

- https://www.linkedin.com/in/nishant-kumar-7a0a94148/

June 2017 - March 2018
PHP Developer *Prologic Technologies Pvt. Ltd.*
- Used excellent knowledge of web technologies including HTML, CSS, JavaScript and AJAX to complete tasks efficiently.
- Skilfully developed and coded back-end components for web applications, completing without difficulty.
- Utilised JavaScript, HTML, and CSS to create interactive and visually appealing web pages.

01/2007
Xth
Hindi (UP Board)

HOBBIES AND INTERESTS

Coding & Problem Solving – Enjoy participating in coding challenges, hackathons, and open-source projects to sharpen my programming skills.
Fitness & Well-being – Regularly practice yoga and gym workouts to maintain physical health.

PROJECTS

Project Name: Get Reviews
Duration: Oct 2024- Present
Role: Fullstack Developer
Technology Stack: Node.js, React.js, Express.js, MySQL, JavaScript, jQuery, HTML, CSS, Bootstrap
Project Overview: Get Reviews is a CRM platform designed to help businesses manage customer relationships and boost their online presence by facilitating the collection and sharing of customer reviews.
Responsibilities in the Project:
• Implementation and Project Management responsibility
• Implemented new functionalities, such as adding new user roles like Assistant Manager and Manager.
• Provided additional module access to new or existing user roles based on project requirements.
• Reviewed code to ensure adherence to coding standards and best practices.
• Conducted thorough user testing of code to identify and resolve bugs, ensuring the reliability and stability of the platform.
Improved the speed of data fetching from the database to enhance platform performance and user experience.
Project Name: Bimquote
Duration: April 23- Sept 2025
Role: Backend engineer
Technology Stack: React.js, Node.js, MySQL, JavaScript, jQuery, HTML, CSS, Bootstrap

Project Overview: BIMQuote.com is a platform dedicated to Building Information Modeling (BIM), which revolutionizes the construction industry by enabling architects, engineers, and contractors to design, visualize, and manage construction projects in a digital environment. BIMQuote facilitates the entire construction process from project conception to final inspection, aiming to simplify home construction on vacant land and become the go-to technologist for small businesses in the construction sector.

Key Features:

• **Visualization**: Provides accurate 3D models for project visualization before construction begins.

• **Cost Estimation**: Generates accurate budgets and tracks costs throughout construction projects to increase profit margins.

• **Project Management**: Streamlines project management processes and improves coordination with subcontractors.

• **Efficiency**: Increases productivity and efficiency, allowing for more projects to be completed in the same timeframe.

• **Lead Generation**: Facilitates lead generation by providing verified leads to users.

• **Quantity Takeoffs**: Generates quantity takeoffs to estimate materials required for construction projects.

• **Scheduling**: Helps in scheduling material orders and deliveries, optimizing project timelines.

Responsibilities in the Project:

• Implementation and Project Management responsibility

• Implemented new functionalities, such as adding new user roles like loan officer and project co-originator.

• Provided additional module access to new or existing user roles based on project requirements.

• Reviewed code to ensure adherence to coding standards and best practices.

• Conducted thorough user testing of code to identify and resolve bugs, ensuring the reliability and stability of the platform.

• Improved the speed of data fetching from the database to enhance platform performance and user experience.

Spearheaded migration efforts by seamlessly extracting data from the client's legacy project or partner database, ensuring smooth integration into our system in alignment with the requirements of my new company's opportunities, thereby granting user access to familiar functionalities from their previous systems.
